THE INTERNATIONAL SHEEP DOG SOCIETY

RULES FOR TRIALS

In these rules the phrase 'the Society' refers to The International Sheep Dog Society

I. THE OBJECTIVES FOR A TRIAL

To test the ability of a dog, as part of a team with the handler, to manage sheep properly under the differing circumstances that may be encountered in daily work. Hence the various tests such as Gathering, Driving, Shedding, Penning and Singling which are all tasks which may be necessary as the shepherd goes on his daily round.

This objective helps meet the Main Object of the Society which is to promote and foster the breeding, training and improvement of the working sheepdog, this to secure the better management of stock.

These rules are formulated specifically for the Society's National and International Trials, but it is intended that the principles outlined may be applied for the general running of all sheepdog trials.

The Society stands firmly for a common standard and this should and must be the constant aim of every Judge and Handler.

To achieve consistency and a common standard, it is the considered opinion of the Society that the general observations and rules on the various parts of a Trial Course included in this document must be followed by Judges at any Trial organised by or being affiliated to the Society.

It will be the responsibility of organisers of Open Trials, whether individuals or committees, to familiarise themselves with, and adhere to, the ISDS Rules for Trials, with particular reference to prior advertising in accordance with the approved procedures under Rule 3.2b.

- d. Every Judge accepting an invitation to act at any of the Society's Trials will be held, by his/her acceptance, to have given an undertaking that he/she will judge strictly according to the Rules laid down by the Society and that he/she will not favour any dog, man/woman, or country.
- e. The Judge who openly or secretly judges according to his/her own ideas of what a good trial run should be does no service either to the Society or the competitors.
- f. Judges must at all times point runs, up to the point of completion, retirement or disqualification, directly on to the official Society Judging Sheets.
- g. It must be acknowledged that it is not always an easy task to decide the merits of a run AS A WHOLE and Judges should always have a good look at the score sheet after the run has been completed and should then decide whether or not they have been too severe or too lax in any one aspect after marking.
- h. Judges are cautioned not to discuss the merits or otherwise of a run with any other person outside the Judges' Box while the Trial is in progress. Should such an approach be made the Judge will refer them to Rule 5.1h.
- i. The Judges are empowered to direct any Competitor showing insufficient merit to retire, bearing in mind the necessity to safeguard the welfare of the dogs and sheep.
- j. The run commences when the dog is directed /leaves the handler on its outrun.
- k. The run finishes and the Judge completes his/her marking when either the pen gate is closed on the sheep or the Judge accepts the single, or whichever is the final phase or immediately there has been a disqualification, retirement or time is called.
- l. The command by whistle is to be regarded as the same as a spoken command.
- m. Good handling in difficult situations will be taken into consideration by the Judge.
- n. No points will be awarded for any phase of work that has not been completed within the prescribed time limit.
- o. The Judge's decision is final providing their conduct is in accordance with the Rules for Trials.

- h. A dog not taking the re-directional commands must be penalised more severely than one that does.
- i. The dog should not stop until it has reached the point of balance. The point of balance being where it will lift the sheep in the direction of the first obstacle.
- j. It is obviously more serious if a dog stops on its outrun than if it goes on after being re-directed, and Judges should mark accordingly.
- k. The dog should not cut in.
- l. A good outrun should be in the shape of one side of a pear with the blunt end of the pear at the far end of the field near the sheep.
- m. The dog should finish far enough away from the sheep so as not to disturb them.
- n. For a crossed outrun a minimum of 80% of the total points for the Outrun is to be deducted and, in addition, points must be deducted for commands.
- o. The perfect outrun should be completed without any commands and Judges should deduct points for every command given and the loss of points will depend upon the Judges' views of the seriousness of the mistake.
- p. Where the Outrun ends will vary with the actual position of the sheep. If the sheep have left their appointed place at the post, the outrun should end at the point where the dog is facing them in order to bring the sheep in a direct line to the first obstacle. This might necessitate the dog stopping on the side of its outrun if the sheep happened to be coming to meet it, and conversely could mean it going a long way past the post if the sheep were going away from the post in the same direction as it is running.

5.2.3 Lift

- a. At the end of the Outrun, the dog will either come to a full stop or merely slow down.
- b. The dogs approach should be smooth, cautious and steady.
- c. The dog will take control in a firm and quiet manner.

- d. The dog should not rush in and startle the sheep, nor should it lie back and require numerous commands before getting its sheep on the move.
- e. The lift should be smooth and balanced where the sheep move away in a direct line to the first obstacle.
- f. Judges should use their personal knowledge of sheep and sheep dogs to determine whether a lift has disturbed the sheep unduly and mark accordingly.
- g. Judges will deduct points for excessive commands, slowness, etc. at this point of the trial.

5.2.4 Fetch

- a. The sheep must be brought at a steady pace and in a straight line from the place of lifting to the first obstacle and thereafter in a straight line to the handler/post. If the sheep deviate from the line, they should be brought back to that line as soon as practicable.
- b. The dog should not hurry or over-flank the sheep (i.e., that it should not go too far either side of the sheep, thereby turning them across the course and giving a zig-zag movement).
- c. The dog should require few commands and where the sheep stray from the true line the dog's ability is judged by its control of them and its immediate answer to all commands.
- d. No retry at the gate is allowed.
- e. If the gates are missed or if the sheep are off-line, the penalty must reflect all of the circumstances, and in particular the amount of fault attributable to the dog and/or the handler. Both can be the subject of penalties. If the sheep are docile and mistakes are made, then the penalty should be more severe than where the sheep are awkward and thereby contribute to diversions which the dog is unable to avoid.
- f. If a gate is missed there should be a minimum deduction of one point per sheep, but Judges must take into consideration all the relevant circumstances contributing to the missing of the gate and adjust deductions accordingly.
- g. Unless instructed otherwise by the Trials Committee, at the end of the Fetch the handler shall pass the sheep around the post /behind the handler as close as is practical and the whole work should be done in a steady and smooth manner.

5.2.5 Driving

- a. The drive can run from left to right or right to left according to the course and the decision of the trials committee.
- b. The first leg of the drive starts immediately the sheep have passed behind the handler/post.
- c. Having driven the sheep through the first set of gates they should be turned immediately on to a direct line across the course to the second set of gates. When through these gates they should then be turned as neatly as possible on to a straight line to the shedding ring.
- d. It is important that the last leg of the drive should be in a straight line to the shedding ring which is usually situated to make this also the most direct line.
- e. The dog should show obvious ability to drive steadily without excessive commands.
- f. The sheep are required to go in straight lines between the obstacles and reasonable turns at the post and at both gates are expected. If the sheep deviate from the line, they should be brought back to that line as soon as practicable.
- g. As in the Fetch, the gates are an obstacle to be negotiated also a guide to the alignment of the sheep.
- h. Throughout the Drive the sheep should be kept moving gently - excessive bursts of speed and subsequent stopping are not desirable and should be penalised.
- i. If a gate is missed there should be a minimum deduction of one point per sheep, but Judges must take into consideration all the relevant circumstances to the missing of a gate and adjust deductions accordingly.

- j. A retry at any gate is NOT allowed.
- k. The handler will remain at the post until the first of the sheep is in the shedding ring.
- l. The Drive ends when ALL the sheep enter the shedding ring.

5.2.6 Shedding

- a. Two unmarked sheep to be shed within the ring.
- b. Shedding necessitates negotiation of the sheep within the ring by the handler and dog to the best position for effecting the deliberate shed by the dog of two specified sheep.
- c. For the Shed to be complete and deemed satisfactory by the judges, the dog is required to shed two of the un-marked sheep within the ring and show control of them, either in or outside the ring.
- d. The important aspect here is to test the dog's ability to shed or separate the two unmarked sheep from the rest of the flock.
- e. It is not necessary for the dog to come right through to the handler.
- f. The dog is required to show its ability to separate and hold the shed sheep away from the rest of the flock. It is not a requirement for the sheep to be driven away.

5.2.7 Penning

- a. On completion of the shedding the dog will reunite all the sheep, not necessarily within the ring but in a practical and workman like manner, and the handler must proceed to the pen, leaving the dog to bring the sheep to the pen.
- b. The handler is forbidden to assist the dog to drive the sheep from the shedding ring to the pen.
- c. The handler will stand at the gate holding the rope and must not let go of the rope unless it is necessary to re-shed.
- d. It is for the dog to manoeuvre the sheep into the desired position to conclude a successful pen.
- e. The handler must not use the gate to lever the sheep into the pen nor should he/she touch the sheep with the pen gate which will result in points being deducted.
- f. The handler must completely close the gate within the time limit/before releasing the sheep again.
- g. After releasing the sheep, the handler will close and fasten the gate and shall be penalised for failure to fasten the gate.

5.2.8 Single

- a. Pointing of the Single will commence immediately the sheep leave the pen.
- b. The handler will proceed to the shedding ring, leaving the dog to bring the sheep from the pen to the ring.
- c. One of two marked sheep will be shed off within the ring and thereafter worn in or outside the ring to the Judges' satisfaction.
- d. Handlers are forbidden to assist the dog in driving off or attempting to drive off the single any distance or by forcing it on the dog.
- e. The Single is complete when the dog has worn the sheep to the Judges' satisfaction. The judges will indicate.
- f. As with the Shed the dog and not the handler should come in and cut off the single sheep.
- g. Far too many handlers are seen cutting off the sheep whilst the dog lies back acting as an almost disinterested spectator and should be penalised accordingly.
- h. The greatest help the handler can give his/her dog is by getting out of the way and allowing the dog room to prove its ability to take off and wear a single sheep.

- i. It is essential that the dog should be able to keep the single sheep away from the remainder and the Judges should not express their satisfaction until the dog has been thoroughly tested and they are satisfied that it has proved its ability to do this.
- j. The behaviour of the sheep should be considered by the Judges when deciding whether the Single has been effectively completed or not.

5.2.9 Scale of Points

No points will be awarded for any phases of the work that have not been completed within the prescribed time limit.

Outrun (20); Lifting (10); Fetching (20); Driving (30); Shedding (10); Penning (10); Single (10); Total = 110 points.

5.2.10 Time Limit

15 minutes. No extension.

- c. Each dog will keep to its own side.
- d. Throughout the run, if the dogs should cross, they must be returned to their respective sides as soon as possible.

- e. The dogs should not hurry or over-flank the sheep (i.e., that they should not go too far either side of the sheep, thereby turning them across the course and giving a zig-zag movement.

APPENDIX – for information only

MERIT POINT CALCULATIONS

At the end of the Supreme Championship the Trials Secretary will calculate the Merit Points as follows:

1. Take the ranking of competitors by points for each Judge in turn and award 15 points for first, 14 for second, etc. (this assumes there are 15 dogs in the Supreme)
2. If two have the same Judges' points, the Merit Points are a share of the next two positions and where three have the same Merit Points are a share of the next three, etc. For example, if two dogs are on the same Judge's points and the next level is 12 Merit Points, they will be awarded $(12+11, \text{divided by } 2) = 11.5$ Merit Points each. Three dogs at 10 points will receive $(10+9+8, \text{divided by } 3) = 9$ Merit Points each.
3. The sum of the Merit Points, calculated by Judge for each dog, decides the final ranking with the highest number coming first. For example, if each Judge placed the same dog in top place it would receive $(15+15+15+15) = 60$ Merit Points.
4. In the event of Merit Points being equal for any dog the final order will be decided by the total number of Judges' Points awarded. If these are equal then points on Outrun, Lift and Fetch added together will decide.
